

Storm water Ordinance

#206 Storm Water

The total storm water runoff from a lot, after construction, shall not increase from the natural condition, ensuring that the rate of surface water runoff from the site does not exceed pre-development conditions and that the quality of such runoff will not be less than pre-development conditions. This applies to all new and existing lots including non-conforming lots of record.

Note: Storm water discharge must be dealt with on-site using mechanisms such as rain gardens or bio-retention ponds.
